Elise and Geoff, ORD is working on a game plan. Please see the first attachment, prepared by Jay Garland of NRMRL.

Part of this large effort will be satisfied by a series of CRADAs. Please see Overarching Goal #2 – work with interested commercial vendors to evaluate their technology with a focus on microbiology.

For the CRADA effort:

The Lab will first create the Letter of Intent, as soon as they have their principle investigators lined up. The PIs will pull together the Statement of Work, and Identify collaborators willing to participate in the effort. (Some potential collaborators can be found in OLEM's research needs paper – also attached.) Sarah and I will create each of the CRADAs once the collaborators have been selected. After a review and comment opportunity, each CRADA will be first concurred upon by OGC; then signed by the Lab Director; and finally by the collaborator. We may have OLEM and OW sign as well, depending on their level of participation in the system evaluation effort.

That's what we have for now. Any questions? Please let me know.

*"Everything should be made as simple as possible,  
but not simpler." - Albert Einstein*
